Breath^eCoat

BETON CIRE VENEDEC TF

Bring timeless elegance to your interiors with Beton Cire VENEDEC TF. This seamless decorative finish combines contemporary aesthetics with exceptional durability. Suitable for floors, walls and furniture, it creates a refined, minimalist appearance while remaining easy to maintain. Available in a wide range of colours, it is the perfect choice for modern residential and commercial spaces.

TERACOAT

Teracoat Seamless is a premium seamless flooring solution combining contemporary design with outstanding durability. Its smooth, joint-free finish delivers a clean, elegant appearance while offering excellent resistance to daily wear. Easy to maintain and available in a wide range of colours, it provides the perfect balance between aesthetics and performance.

POLISHED CONCRETE FLOORS

Polished Concrete is a cement-based decorative flooring system polished to create a smooth, glossy and highly durable finish. Suitable for both residential and commercial projects, it offers exceptional resistance to wear while requiring minimal maintenance. Different polishing levels allow a choice of gloss and aggregate exposure to suit each design. Fibre reinforcement is recommended to minimise shrinkage and maximise durability.

TERRAFLOOR

TERRAFLOOR ANTI-SLIP

TerraFloor is a decorative cement-based floor system incorporating carefully selected natural aggregates. Once polished, it creates a smooth, highly durable and easy-to-maintain surface. Various combinations of colours and aggregates are available to achieve unique decorative finishes.

Vuka Floors are advanced epoxy and polyurethane flooring systems engineered for maximum durability and performance. Resistant to chemicals, abrasion and heavy traffic, they are ideal for industrial facilities, warehouses, commercial premises and public buildings. Available in a variety of finishes, Vuka Floors combine strength, safety and long-lasting protection for demanding environments.

VUKA CRETE MD

Vuka Crete MD is a multi-component, water-based polyurethane flooring system incorporating antimicrobial agents. It is applied at a thickness of 3.5–4 mm.

VUKA CRETE HD

Vuka Crete HD is a heavy-duty, multi-component water-based polyurethane flooring system incorporating antimicrobial technology. It is designed for industries requiring exceptional chemical resistance and mechanical strength, and is applied by trowel at a thickness of 6–9 mm.

VUKA SEAL 200

Vuka Seal 200 is a high-performance, water-dispersed epoxy coating with a semi-matt finish.

VUKA FLOW 401

A solvent-free, filled, coloured epoxy flooring system providing a smooth and durable floor finish, installed at a thickness of 2.5–4 mm.

Our self-levelling compound is a high-performance underlayment designed to correct uneven substrates and create a perfectly smooth, level surface before the installation of floor coverings or coatings. Applied at thicknesses from 3–10 mm, it offers excellent flow, rapid curing and high compressive strength. It bonds exceptionally well to concrete and cementitious screeds, making it the ideal preparation layer for decorative finishes, epoxy systems, polyurethane flooring, ceramic tiles and many other floor coverings.
